

INDUCTION ILLUMINATION

COIL RING SYSTEM MAGNETICALLY INDUCED, GAS DISCHARGED AND DIGITALLY CONTROLLED INDUCTON LIGHT SOURCE

Our company is the distributor of this innovative digital magnetic illumination technology (DMLS = Digital Magnetic Lighting System) since January 2010. (as partner of the sole European representative of the authorized producer).

The induction technology allows low-power environment friendly light sources and fixtures with high luminous flux, 100 000 hours of lifetime and 5 years replacement warranty.

Major fields of application

- public lighting
- floodlight
- industrial lightig
- office & institutional lighting,
- operation with renewable energy
- park lighting,
- explosion-proof solutions,
- household

The lamps are compatible with the lamp sockets in common use and can be adjustad to any solution.

Major advantages:

- energy saving,
- extra ordinary long life time
- flickering- and glare-free operating on 210 kHz frequency,
- high light quality
- colour rendition and colour temperature is close to the natural daylight (2700 – 6500K)
